

### UFUDU Mobile Transpack Cabins

Ufudu distributes our full range of mobile Transpack cabins, steel container conversions and prefab buildings throughout Southern Africa. We specialise in the creation of prefab buildings for sale and hire across Southern Africa, and South Africa is one of our company's biggest markets. We were recently involved in a large project at the Joe Morolong Hospital in Vryburg, South Africa.

The South African Department of Health asked our South African parent firm Speedspace to construct a 32-bed Clinic at the Joe Morolong Hospital in response to the COVID-19 pandemic and the need for additional space to treat those infected. The clinic met the Department of Health's stringent requirements, accommodating 6 ICU beds, 8 High-care and 18 general ward beds, complete with associated facilities such as a functional dispensary, nurse's stations, offices and consulting rooms, storerooms, sluice rooms and ablation facilities.

A cost-effective modular prefab panel system was chosen for the design, as it is particularly well-suited for units intended for long use such as accommodation, ablutions, dormitories, kitchens, schools, clinics, houses or modular site offices (including large on-site complexes).

The modular prefab panel system can be customised to suit specific client requirements and can be delivered very efficiently when there is a need for a structure to be built with urgency. In this particular example, we were able to design, build and deliver the 682m<sup>2</sup> clinic in 68 days from start to finish. This included civil works as well as external water and electrical reticulation.

The clinic was also fitted with a state of the art HVAC and Hepa air filtration system specially designed for managing airflow exchanges.

Please find our current retail pricing below, available to all our clients in Zambia. Our UFUDU Container Solutions are available for purchase or rental. We offer fast delivery and professional installation.
